

Dedicated NT 4.0 Server

If you or your business relies on the Internet for mission-critical operations, you probably need something more than an off the shelf hosting package. Our Dedicated NT Servers offer you incredible ease of administration for your sites.

Platform

Our NT Servers are the choice when integrating your site with other Microsoft products like SQL, Site server and Front Page. Our dedicated servers are designed to exceed expectations of the most demanding users. We use top of the line components to increase performance, reliability and customer happiness. Choose from the following NT Platforms:

| | Platform #1 | Platform #2 | Platform #3 |
|---------|-------------|-------------|------------------|
| CPU | PIII 500Mhz | PIII 550Mhz | Dual PIII 550Mhz |
| RAM | 128MB | 256MB | 256MB |
| Drive | 9GB SCSI | 9GB SCSI | 9GB SCSI |
| IPs | 16 | 16 | 16 |
| Setup | \$350 | \$400 | \$450 |
| Monthly | \$400 | \$425 | \$475 |

Includes root level access to the box, monthly monitoring, rack space and 128Kbps of upstream bandwidth.

Connectivity

NetHere's transport network has been designed to get you where you want to go, fast! We employ our multi-homed DS-3 connectivity with BGP4 routing which dynamically selects the best routes available for your traffic. Furthermore, NetHere's direct transit connectivity to Verio, @Home, Sprint, UUNet and GTE/BBN networks provides your server with the quickest access to sites around the nation and the world.

We provide a dedicated bandwidth connection to your server with unlimited data transfer.

| Price | Bandwidth |
|------------------|-----------|
| Included | 128Kbps |
| Additional \$100 | 256Kbps |
| Additional \$450 | 512Kbps |
| Additional \$850 | 1024Kbps |

Our Dedicated Servers

Superior Network Features

Multi-homed DS-3 Connectivity with BGP4 routing dynamically selects the best routes available for your site's traffic.

Direct transit connectivity to Verio's, Sprint's, UUNet's, @Home, Level3 and GTE/BBN's backbone networks increase your site's performance.

24/7 Network Monitoring proactively keeps your internet presence accessible.

Redundant Environmental Systems keeps the equipment operating at maximum performance.

Fault Tolerant Power Supply through an Uninterruptible Power Supply (UPS) and a 450kW Diesel Generator guarantee your server's uptime.

Inergen Fire Suppression Systems provide the best defense against fire.

Expertise in UNIX and NT web hosting means that we understand your needs.

Our 30-Day Money Back Guarantee makes sure that you are satisfied.

Our 99% Uptime Guarantee protects your site every month.

24/7 Server Monitoring

NetHere monitors the primary IP address of the server every 5 minutes to determine if the primary IP address is accessible. If a response is not received, we notify the server's administrator.

Ready To Go!

Your server is racked and pre-configured with the following software. Just set up your preferences, load your site's content and you're ready to go!

- NT 4.0 Service Pack 6A
- FP 98 Server Extensions
- IIS FTP server
- IIS SMTP Server
- IIS WWW Server
- MS Data Access Components 2.0
- Microsoft Index Server
- Microsoft Script Debugger
- Microsoft Transaction Server
- Windows Scripting Host

Customize Your Server

| Additional Options | Setup | Monthly |
|--------------------|-------|---------|
| Block of 16 IPs | \$50 | \$20 |
| 64MB of RAM | \$50 | \$15 |
| 128MB of RAM | \$50 | \$25 |
| 256MB of RAM | \$50 | \$50 |
| 10 GB EIDE Drive | \$50 | \$25 |
| 9 GB SCSI Drive | \$75 | \$50 |
| Add'l 500 PIII CPU | \$100 | \$40 |
| Add'l 500 PIII CPU | \$100 | \$50 |
